YFEJ -8 viticoltori vignaioli esperti in potatura sistema Guyot

(Clic lavoro n° 0000015011000000000332694)

Descrizione:

I viticoltori devono essere esperti nella potatura tecnica Guyot (tecnica mista).

Tagliare il tralcio che ha già fruttificato, raccorciare a 6/8 gemme il più alto dei tralci del vecchio sperone distendendolo su filo portante e nello speronare a due gemme quello inferiore.

Requisiti:

Esperienza di almeno due anni con padronanza della tecnica Guyot, fissaggio dei tutori e legature tralci

Disponibilità per tutto il periodo del contratto

Contratto e condizioni:

Durata del contratto dal 15 novembre all'8 luglio 2016.

Salario Euro 10,16 lordi all'ora e maggiore se molto esperti.

I selezionati concorreranno ad un affitto modesto per le spese generali dell'alloggio fornito dall'azienda per tutta la durata del contratto.

Come candidarsi:

Inviare la propria candidatura con un curriculum completo delle esperienze nel campo della viticoltura con particolare attenzione alla tecnica Guyot indicando il luogo dei precedenti lavorativi:

Titolo: Experienced Signalling and Interlocking Engineers for Ramboll's Signalling

Department in Copenhagen

Numero di posti: 1

Descrizione:

Would you like to participate in Europe's largest replacement of a signalling system? Or would you like to participate in one of our other large projects? Then you might be one of our new colleagues in our prosperous signalling department. Ramboll is involved in many large and interesting rail projects and therefore we seek a number of new colleagues wanting to contribute to and support our continued growth. Ramboll works with the new pan-European concepts for train control systems (ERTMS/ETCS) as well as more conventional signaling technologies. We are consultants on for instance the following projects: •The Signalling Programme – replacement of all signalling systems on the Danish rail network to new modern ERTMS technology. One of Europe's largest signalling projects, running over 10 years. •ERTMS and signalling projects in the Nordic countries, including large and complex signalling projects. We are among the leading consultants within ERTMS/ETCS signalling systems, capacity analysis as well as project risk and safety management in the Nordics.

- Signalling/interlocking systems and RAMS assignments – with focus on relay based signalling systems, fully electronic systems, ERTMS Level 2/ETCS systems and signalling systems to modern metro and light rail transport systems
- Multidisciplinary rail projects, e.g. the fixed link across the Fehmarn Belt and Fehmarn-Ringsted
- Metro Cityringen - a 100 % underground system consisting of 2 parallel tunnels of 16 km each
- Light Rail Ring 3 in Copenhagen, the largest Light Rail project in the Nordics
- New railway connection across Vejle Fjord and other major multidisciplinary railway projects in Denmark and internationally

Job Description As signalling engineer in Ramboll you will participate in our rail projects from the early studies to detailed design and commissioning. The assignments are carried out in close cooperation with our traffic, capacity, migration and stage planning experts using, among other systems, Open Track and Rail-Sys as IT tools for simulation of new time tables, possible changes to the infrastructure, etc. Your primary work tasks may include project management, planning and design and signalling, tracks and interlocking systems, remote control centres including IT systems, or related to roll outs, and planning of tests, commissioning, safety or approval by the authorities. Depending on your competences, you will have the option to work as design engineer or on projects within construction management and site supervision, tests and commissioning. Within project management, there are possibilities for working as project manager on minor as well as major projects. You will thus play a central part in the upgrading and extension of the Danish and foreign railway network. Your Qualification You possess an engineering degree or similar technical background and have minimum 3 years of experience. Preferably, you have experience as consultant, contractor, supplier or infrastructure owner within signalling and interlocking. Perhaps you have practical experience with signalling or interlocking systems or alternatively you may have experience with complex electrotechnical systems, power, requirements specifications, IT, telecom or automation systems. You are responsible, focused and systematic. You are eager to be where the action is. It is important that you are able to understand complex contexts and have a drive that makes you work proactively, solving your assignments with a high level of quality and observing deadlines. You have a positive perspective on life and appreciate working in an informal working environment, where you have a great influence on your own working day. Join our Team You will be part of a professional, strong and committed Nordic Rail business community with 350 people, including a strong signalling environment with more than 120 traffic and signalling engineers keeping up to date with the technical developments and debate. We work with the new common European concepts for train control systems (ERTMS/ETCS) as well as more conventional interlocking systems, providing you with good opportunity to develop within the latest technology as well as the traditional signalling and interlocking disciplines.

Besides the technical disciplines, Ramboll's key areas also comprise management, consultancy, engineering and process and project management. Further we work within traffic, capacity and safety planning in

connection with major projects. Rail projects are multidisciplinary with interfaces to many parties. Therefore we work with several technical areas in our rail departments and we cooperate with many of Ramboll's other professional environments. We have assignments in Denmark, the Nordics and the rest of Europe, including all project phases.

Your working place will primarily be in Ramboll's head office in Copenhagen (Ørestad), but we are open for discussing possibilities of working from one of our other Ramboll offices. Why You'll like Working here To work at Ramboll means being part of a people organisation. We are focused on knowledge sharing and collaboration across competence areas and geography, and we aim for a strong diversity among our employees. This enables us to solve a broad range of projects, and we firmly believe that crosscollaboration leads to creative and durable solutions. Thus, the possibilities at Ramboll are many and diverse – we invest a lot in development of people and offer career paths tailored for each individual.

Interested? If you would like to explore this position further, please contact Head of Department Karin-Inge Gade Schultz, +45 5161 5693 or Senior Market Director Peter Koch, +45

5161 6442. We prefer to receive your application via the link below and look forward to hearing from you as soon as possible and no later than 20 August 2015. Deadline 20 August Arbejdssted Ørestad,

Copenhagen Ramboll is a leading engineering, design and consultancy company founded in Denmark in 1945. We employ 12,500 experts and have a strong presence in the Nordics, North America, the UK, Continental Europe, Middle East and India, supplemented by a significant representation in Asia, Australia, South America and Sub-Saharan Africa. With almost 300 offices in 35 countries we emphasise local experience combined with a global knowledge-base. We constantly strive to achieve inspiring and exacting solutions that make a genuine difference to our customers, end-users and society as a whole. Ramboll works across the markets: Buildings, Transport, Environment, Energy, Oil & Gas and Management Consulting. kontaktperson Head of Department Karin-Inge Gade Schultz T +45 51615693 M +45 5161 5693 Senior Market Director Peter I. Competent Project Manager for the Signalling Department

Numero di posti: 1

Descrizione:

Are you a talented Project Manager with special interest in ERTMS signalling systems? Then you might be the person we are looking for to become part of Europe's largest replacement of a signalling system in Denmark or other interesting signalling or ERTMS projects. Job Description In Ramboll's Rail Division we strive to be among the leading consultants within modern signalling systems and ERTMS consultancy. For a number of years, we have won many new assignments within this business area and still have continuous flow of new interesting projects.

We constantly focus on providing value-adding solutions meeting the customers' requirements. Ramboll sets as objective to offer the best competences on the market within this area. Therefore we seek competent signaling engineers and project managers with interest in ERTMs signalling systems, contributing to and supporting our continued growth and developments within signalling and ERTMs projects. As project manager in our department, your primary areas of responsibility will be: •Project management of Danish signalling projects or international signalling and ERTMS projects, depending on background and interests •Contact with clients and management of and contribution to the technical work in small and large signalling projects •Guiding the work of less experienced engineers •Depending on your background and areas of interest, we also need resources within business development and tendering Your Qualifications We expect you to deliver consultancy of high quality, providing our customers and business partners with the best service. Perhaps you have a background within signalling systems.

Alternatively, you may have a background as project manager on projects within other industries. We expect you to have a creative personality and good communications skills, both orally and in writing.

The ideal candidate is a team player with: •Experience with specification and implementation of signalling systems and interest in ERTMS

– alternatively you have a relevant background within other areas •Interest in contributing to the development of our services to new clients •Experience with management of complex technical projects •Good commercial understanding, the ability to establish and maintain long term client relations and network •The ability to gain and become familiar with new knowledge and to understand complex contexts and technical solutions •A proactive and energetic approach •A good understanding of client requirements and a good ability to understand and "read" the needs of customers and people around you •Proficiency in English Join our Team You will be part of a professional, strong and committed Nordic Rail business community in Ramboll with 350 people, including a signalling environment with more than 120 traffic and signalling engineers keeping up to date with the technical developments and debate.

We work with the new common European concepts for train control systems (ERTMS/ETCS) as well as more conventional interlocking systems, providing you with good opportunity to develop within the latest technology as well as the traditional signalling and interlocking disciplines. Our current signalling projects comprise Europe's largest replacement of a signalling system, the Danish Signalling Programme, Agenzia per la formazione, l'orientamento e il lavoro Via Soderini, 24

replacing the entire signalling system on all main lines in Denmark. We are consultants on Ring 3 Light Rail in Copenhagen (the largest Light Rail scheme in the Nordics), Metro Cityringen in Copenhagen and we are also involved in several international projects. For instance, in cooperation with Ramboll Norway we deliver consultancy services on modern signalling systems (greenfield and brownfield projects and ERTMS) to the Norwegian railway agency (Jernbaneverket). Ramboll has 2,500 employees within transport and thus constitutes one of the greatest professional environments in the Nordics within transport, rail and signalling/ERTMS. Besides the technical disciplines, Ramboll's key areas also comprise management, consultancy, engineering and process and project management. You will primarily be working in Ramboll's head office in Copenhagen (Ørestad), but we are open for discussing possibilities of working from one of our other Ramboll offices. Why You'll like Working here To work at Ramboll means being part of a people

organisation. We are focused on knowledge sharing and collaboration across competence areas and geography, and we aim for a strong diversity among our employees.

This enables us to solve a broad range of projects, and we firmly believe that cross-collaboration leads to creative and durable solutions. Thus, the possibilities at Ramboll are many and diverse – we invest a lot in development of people and offer career paths tailored for each individual. Interested?
